

Moyse Environmental Services, an established environmental and land use consulting firm in Maine is seeking a motivated and capable professional to fill a new position of:

WETLAND/SOIL/ENVIRONMENTAL SCIENTIST

B.S in plant and soil science, environmental science or related field; or equivalent combined years of education, experience and training, is required.

We are seeking an individual experienced and knowledgeable in wetland identification/delineation and related protected resources (vernal pools, streams, etc.). Must have a good understanding of soils and be competent in the field description of landscape features from wetland plant communities to soil profiles. Expertise in Maine NRPA and Corps 404 permitting is desired. Also, experience in erosion & sediment control is a plus as this position may involve third-party inspection work.

Must be able to perform demanding field work and office work. Strong report writing and computer skills are required. Working knowledge of GPS equipment and GIS/CAD capability is desired.

Must possess a solid work ethic, positive attitude and willingness to learn and grow professionally as part of a team.

Compensation commensurate with experience and ability. Benefit packages typically include health/disability insurance, paid vacation/holidays, retirement plan and much more.

Qualified individuals only, please send resume and transcripts to:
