Natural Resource Scientists**

NHANRS & SSSNNE

Present

SOIL MAPPING WORKSHOP
Principles, Process & Techniques

FRIDAY AUGUST 16, 2013
8:00am - 3:00pm

Strafford County Courthouse
Cafeteria Conference Room
259 County Farm Road
Dover, NH

(Directions - www.courts.state.nh.us/courtlocations/straffsupedir.htm)

This workshop will provide instruction in the principles, process and techniques of soil mapping based on the standards for NH. The morning

lecture will include an overview of the basic components of Site Specific Soil and High Intensity Soil Surveys (HISS) and their supporting reports.

In the field session, small groups will be led by a seasoned NH Certified Soil Scientist and given a base map on which they will construct their own Site Specific Soil Map, soil legend and HISS correlation table.

This workshop is intended as a refresher and interaction for experienced Soil Scientists and as training for Soil Science Apprentices and those intending to apply for NH certification (CSS).

Instructor **Tom Peragallo**, CWS, CSS, works for LEC Environmental Consultants, Inc. and has 36 years experience including 12 years with the NRCS. He is Chairman of the NH Board of Natural Scientists and Vice Chairman of the NE Hydric Soil Technical Committee.

James Long, CSS, CWS, LF is Senior Wetland Scientist and Soil Scientist with GZA Geoenvironmental

Other certified Soil Scientists will be assisting in the field.

SSSNNE will hold a brief business meeting during the lunch break.

For registration and details go to nhanrs.org and download the flyer for this workshop in the Upcoming Events section or contact Susan at assistant@nhanrs.org, 603-224-0401.
